

## Avery 5160 Easy Peel Address Label Printing Instructions

The template provided is for the Avery 5160 Easy Peel Address Label product – non-Avery products are not optimized for our template may not work.

- **Test print.** Print first on a sheet of plain paper to determine which direction to feed in your printer and to check your design and alignment.
- **Print actual size (100%) – Never “Fit to Page.”** Make sure the “Fit to Page” box is not checked. Otherwise, your printing will not be printed at the actual size and won’t align properly to the product.
- **Printer settings.** After you click Print, click on Properties or Preferences, or look for the “Print using system dialog” option where you’ll find Paper options.
  - For laser printer labels - change the Paper Type to "Labels"

If your printer doesn't have a Labels setting under Paper Type, choose "Heavyweight" or "Cardstock" instead.
